1. Permits, Change, Transfer, Renewal, Sale

Permit Conditions:

(1) Underground flows of 5 gpm from roof will be monitored for baseline parameters. Division to be notified 24 hrs prior to monitoring.

(2) Submit water quality data for the Deer Creek Mine in an electronic format through the EDI web site.

(3) No mining on Federal Lease UTU-87285 until approved by Assistant Secretary of Lands & Minerals. Approved by Secretary on October 11, 2006

2. Signs and Markers

The ID signs are at points of public access and contain the necessary information.

4.d Hydrologic Balance: Water Monitoring

First quarter 2008 water monitoring information is in the EDI website and has been uploaded. Water monitoring is current.

22. Other

A coal spill from the coal stockpile has extended over the hill side and made its way down into the drainage system adjacent to the main access road. Portions of the spill have been cleaned but a large amount is still present on the hillside and lower reaches of the drainage. The material needs to be cleaned up. This area is within the disturbed area and drainage from the area reports to a sediment pond.
